SUMMARY

Information Systems student building practical products at the intersection of AI, automation, and business. Experience improving SaaS sales operations, developing full-stack and web projects, and translating user needs into useful technology.

EDUCATION

Bachelor of Science in Information Systems

Expected Apr 2028
Provo, Utah

Brigham Young University - Marriott School of Business

GPA: 3.62 | Association for Information Systems | Electives: AI, product development, and software startups

EXPERIENCE

Teaching Assistant - IS 581: Managing a Software Startup

Sep 2026 - Present
Provo, Utah

Brigham Young University - Marriott School of Business

- Review student projects, help run classroom activities, provide feedback, and grade coursework focused on managing software startups.
- Help develop a Software Startup Simulation that teaches validated learning through product, technical, marketing, and resource-allocation decisions.

Sales Development Representative

Mar 2026 - Present
Hybrid

EZsalt - SaaS startup

- Automated 75% of follow-up workflows in HubSpot, improving CRM consistency and reducing repetitive sales administration.
- Use AI-assisted research and automation to save more than one hour daily across a three-person sales team.
- Research 300+ prospect accounts weekly and generate an average of two meetings per day while sharing customer needs with the product team.

SELECTED PROJECTS

Starrboard - Developer

2026

AI-powered academic command center

- Built a full-stack dashboard that brings assignments, calendars, notes, textbooks, and course platforms into one place using AI, automation, product design, and API integrations.

Athlete Recruiting Platform - Developer

2026 - Present

SaaS recruiting profile platform

- Building shareable athlete profiles that organize athletic statistics, academics, highlight videos, contact information, event calendars, and college-coach outreach.

IS Career Launchpad

2026

Product and web development

- Created a JavaScript decision-tree experience that recommends Information Systems career paths and shares relevant skills, tools, salary information, and interview preparation.

SKILLS

Technology

JavaScript, HTML, CSS, Python, SQL, GitHub, API integrations

AI and Automation

Generative AI, workflow automation, AI-assisted research, prompt engineering

Product and Business
